Some words about the training

Training includes 4 modules :

- 1st module: Understanding the needs /Themes 1 and 2 + preliminary assignment
- 2nd module: Methodology / Themes 3 and 4
- 3rd module: How to engage stakeholders/ Themes 5 and 6
- 4th module: Evaluation / Themes 7 and 8

It consists of one preliminary assignment and eight lessons. If you want to get credits, you have to do also intermediate assignments and a final assignment.

Timetable for training:

www.in-work-project.eu

Grant Agreement n. 2022-1-IT02-KA220-HCD-00008/184

1st module

UNDERSTANDING THE NEEDS

www.in-work-project.eu

Grant Agreement n. 2022-1-IT02-KA220-HED-00008/184

This project has been funded with support from the European Union. The European Commission's support for the production of this publication does not constitute an endorsement of the contents, which reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Co-funded by
the European Union

The 1st module: UNDERSTANDING THE NEEDS

After completing this module, you will

- **know** what the IN-WORK project is
- **become aware** of why everyone has the equal right to learning and working life
- **recognize** the diversity of higher education students
- **understand** what individual support needs can mean for higher education students and what kind of support they may need in their studies at the workplaces
- **recognize** obstacles in learning and working for students with special needs
- **learn** to plan solutions that increase accessibility and inclusion

Co-funded by
the European Union

You are warmly welcome to this training!

Please, introduce yourself:

- who are you and where do you come from?
- what is your connection/experiences to WIL and students with special needs?
- what do you want to achieve by participating this training?

www.in-work-project.eu

Grant Agreement n. 2022-1-IT02-KA220-HED-000087184

This project has been funded with support from the European Union. The European Commission's support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Why is the training needed?

- According to In-Work research, the transition from school to work for young people with special needs can be challenging.
- Efforts to improve inclusion and access to employment opportunities exists.
- Education and training are crucial in preparing individuals with special needs to meet the demands of the modern labour market.

What is IN-WORK-project?

1/2

IN-WORK addresses the role of the university within its reference region as a driver for an inclusive culture, by developing and testing a model of intervention focused on relations between inside and outside the university, and engaging people involved.

The project adopts the work integrated learning method, which includes work-based learning (internships and traineeships), to support people with special needs either enrolled or not in the university in undertaking meaningful learning experiences based on relations with the world of work.

The project work will be inside the university, to stimulate the use of work-integrated learning pedagogies in an inclusive way by teachers, also by means of online technologies, and outside the university, to promote a culture of inclusion through the involvement of business players in the learning design and development.

www.in-work-project.eu

Grant Agreement n. 2022-1-IT02-KA220-HCD-00008/184

Theme No 1

Inclusion

Co-funded by
the European Union

What comes to your mind when you hear the word "inclusion"?

www.in-work-project.eu

Grant Agreement n. 2022-1-IT02-KA220-HED-00008/184

This project has been funded with support from the European Union. The European Commission's support for the production of this publication does not constitute an endorsement of the contents, which reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

What does "Inclusion" mean?

- **INCLUSION** refers to the practice of ensuring that all individuals, regardless of their differences or characteristics, have **equal access to and participation in** various aspects of life, such as education, employment, and social activities.
- It promotes **diversity, equality**, and the **respect** of individual rights.
- Inclusion aims to eliminate discrimination, prejudice, and barriers that can prevent individuals from fully participating in their communities.

Universal Design Principles

1/3

1. Equitable use

The design is useful and marketable to people with diverse abilities. (ex.: a makerspace that has equipment and furniture to make it usable by students with a wide range of characteristics, including disabilities).

2. Flexibility in use

The design accommodates a wide range of individual preferences and abilities. (ex.: a design that allows a museum visitor to choose to read or listen to the description of the contents of display cases).

3. Simple and intuitive use

Use of the design is easy to understand, regardless of the user's experience, knowledge, language skills, or current concentration level. (ex: a 3-D printer easy to use with clear instructions).

Co-funded by
the European Union

Universal Design Principles

2/3

4. Perceptible information.

The design communicates necessary information effectively to the user, regardless of ambient conditions or the user's sensory abilities. (*Dormitory ex: An emergency alarm system with visual, aural, and kinesthetic characteristics*).

5. Tolerance of errors

The design minimizes hazards and the adverse consequences of accidental or unintended actions. (*ex.: software controls that provide guidance when the student makes an inappropriate selection*).

6. Low physical effort

The design can be used efficiently and comfortably and with a minimum of fatigue. (*ex.: Doors with sensors that automatically open for everyone*)

Co-funded by
the European Union

Universal Design Principles

3/3

7. Size and space for approach and use.

Appropriate size and space is provided for approach, reach, manipulation, and use regardless of the user's body size, posture, or mobility. (*ex: work area in a science lab that is usable by students who are right- or left-handed and have a wide range of physical characteristics*).

International Legislation

1/3

1. Universal Declaration of Human Rights (UDHR, 1948):

- **Article 26:** everyone has the right to education, education should be free (at least in the elementary and fundamental stages. Education should promote understanding, tolerance, and friendship among all nations and all racial or religious groups.

2. International Covenant on Economic, Social and Cultural Rights (ICESCR, 1976):

- **Article 13:** the right to education is a fundamental human right. emphasises the accessibility of education.

International Legislation 2/3

3. Convention on the Rights of the Child (CRC, 1989):

- **Article 28:** the right of every child to an education. Education should be directed to the development of the child's personality, talents, and mental and physical abilities to their fullest potential.

4. International Labour Organization (ILO) Conventions, 1998:

- several conventions related to labor rights and non-discrimination promote equal opportunities for employment and protection against discrimination, e.g. no. 111 on Discrimination (Employment and Occupation) and Convention no. 156 on Workers with Family Responsibilities.

International Legislation 3/3

5. Education for All (EFA) Declaration and Framework for Action (2000):

- every child, youth, and adult has access to quality education. It promotes inclusive education as a mean to reach marginalized groups.

6. United Nations Convention on the Rights of Persons with Disabilities (CRPD, 2006):

- **Article 24:** the right of persons with disabilities to education on an equal basis with others. **It obliges states to ensure an inclusive education system and reasonable accommodation to support their learning needs.**

Co-funded by
the European Union

The UN Convention on the Rights of Persons with Disabilities, adopted in 2006

aim is to ensure every person human
rights and opportunities to participate
to society

disability is seen as a result of a

Theme No 2

**What are
“special
needs”?**

Co-funded by
the European Union

Students with special need /Spanish definition

- **Students with disabilities.**

They have a disability certificate of 33% or more and need specific support for academic activities.

- **Students with specific educational needs.**

They do not have a disability certificate, but they have specific educational needs that can be proven, such

as learning disorders, developmental disorders, or mental disorders.

What are "Special needs"?

- The official definition of 'special need' in education
- The official definition of 'special need' in the labour market

Co-funded by
the European Union

The official definition of 'special need' in education: Finnish example

The need for special support is most often understood as a specific pedagogical need for support in HE. HE-students' needs for support can be caused by e.g.

- a diagnosed or undiagnosed learning disability, illness or disability
- social, emotional and mental health difficulties
- lack of motivation, stress, coping problems, hopelessness
- life situation; difficulty reconciling studies, work, family, hobbies, etc. and financial difficulties.

The official definition of 'special need' in the labour market: Finnish example

- In the labour market, the term “A person with partial work ability” is used instead of “special needs”. This term refers to a person who has at his disposal a part of his working capacity and a desire to use this ability, but not even this term is unambiguous.

Discussion about the phases of WIL

How it is possible to organize

- Individual guidance and counselling
- Peer-assisted learning and role modelling
- Mentorship
- Clear and accessible instructions
- Flexible working hours
- Use of assistive technology

The 3rd module: HOW TO ENGAGE THE STAKEHOLDERS?

After completing this module, you will

- **Know** who are the most important stakeholders for you
- **Learn** to map and develop collaborative work between stakeholders and universities
- **Learn** to recognize connections and collaboration with universities and stakeholders
- **be encouraged** to try best practices

Theme No 5

Engagement of the stakeholders

Why is the engagement of stakeholders needed?

“Stakeholder engagement plays a pivotal role in the success of Work Integrated Learning (WIL) programs, especially those catering to students with special needs and disabilities. It is through collaboration and partnership among various stakeholders that inclusive, supportive, and effective learning environments can be created.”

Methodological guide for stakeholder engagement

Strategies for Involving Stakeholders

Clear communication channels

Establish transparent communication channels among stakeholders to facilitate the exchange of information, expectations, and feedback.

Regular evaluation

Implement mechanisms for ongoing evaluation and feedback collection to identify areas for improvement and best practices.

Collaborative planning

Encourage collaborative planning sessions that involve all stakeholders to align WIL goals and outcomes.

Inclusive practices

Promote inclusive practices that consider the unique needs of all students, including those with special requirements, within the WIL framework.

Training and development

Provide training for stakeholders, particularly employers and faculty, to equip them with the skills and knowledge needed to support students effectively.

Acknowledgments by the educational institution

These acknowledgments serve as tokens of appreciation and recognition for the invaluable contributions made by stakeholders in our inclusive Work-Integrated Learning initiatives.

Monitoring and assessment of the progress of the students and benefits of WIL

Co-funded by
the European Union

During the WIL activity, placement or internship phase, continuous monitoring and assessment of students' progress and achievements take place. Faculty, instructors, and workplace supervisors must work together.

After the practical experience, students engage in reflection and evaluation activities to assess their learning, strengths, and areas for improvement.

To discuss: How to monitor and assess? What to monitor and assess? When and with who to monitor and assess?

Co-funded by
the European Union

Reflection, feedback and evaluation of the progress of WIL

- Faculty and educational institutions should assess the impact of work-integrated learning on student learning and the achievement of curriculum objectives
- To discuss:
 - How to **reflect and evaluate**? What to reflect and evaluate? When and with who to reflect and evaluate?
 - How to **develop** practices in your own organization after reflecting and evaluating? What needs to be changed, what should be preserved? Who has the main responsibility for planning development measures, linking them to structures and staff orientation?

Co-funded by
the European Union

Evaluation of the progress of training

- What was the most important and meaningful for you in training?
- How did your skills and competences improve during the training?
- How did the training influence on your own work with students?
- How was inclusion and participation concerned in the training?
- How would you develop the training program?

Co-funded by
the European Union

Checklists and guides to use at the workshops!

- A checklist for inclusive apprenticeship (and job) design
- Creating a mentorship program
- Defining some key metrics
